

KNOW THE SIGNS

How to tell if it's bed bugs

- ✓ Small rust-colored spots on sheets and mattress seams.
- ✓ Pale shed skins and tiny white eggs in seams and crevices.
- ✓ Flat, reddish-brown bugs about the size of an apple seed.
- ✓ Itchy bites, often in lines or clusters. Not everyone reacts.

One thing you can do now

Bag bedding and clothing, then run it through the dryer on high heat for at least 30 minutes.

It's not about clean

Bed bugs hitchhike on luggage, furniture and clothing. Any home can get them.

PRIVATE, JUDGMENT-FREE SERVICE

WHERE THEY HIDE

Closer than you think

- 1 Mattress seams, tags and tufts
- 2 Box spring underside
- 3 Headboard and frame joints
- 4 Nightstand drawers and joints
- 5 Baseboards and carpet edge
- 6 Picture frames and outlet covers

What not to do

- ✗ No foggers or bug bombs. They scatter bed bugs into walls.
- ✗ Don't move to the couch. They follow you and spread.
- ✗ Don't throw out your mattress. It's rarely needed.
- ✗ Don't carry bedding through the house unbagged.

OUR PROCESS

A plan that finishes the job

- 1 **Confirm it**
A careful inspection to verify bed bugs and find how far they have spread.
- 2 **Prep made simple**
Our one-page prep sheet tells you exactly what to do and what you can skip.
- 3 **Treat thoroughly**
Beds, furniture, baseboards, cracks and crevices. Everywhere they hide.
- 4 **Follow up**
Return visits and re-inspection until the activity is gone.

The prep sheet, in short

Wash and dry bedding on high heat. Bag clean clothes. Clear the floor around beds and couches. Leave everything else where it is, so we can treat where they actually are.

Landlords and property managers

We work with owners and tenants, and can inspect neighboring units, where bed bugs commonly spread.

WHY ALL STAR
